## PROFESSIONAL SUMMARY

Full Stack .NET Developer with 8+ years of experience in building scalable enterprise applications. Strong command of .Net MVC, .NET Core, C#, SQL, and React.js, with a proven track record in automating systems and solving critical production issues. **Microsoft Certified:** Azure Fundamentals. Recognized for quick learning, initiative, and ability to simplify complex systems.

## WORK EXPERIENCE

### Software Developer II

📅 January 2023 – April 2024

Symcor, Canada

- › Designed and deployed features in vendor applications for cheque processing and X9 file generation using .NET and Azure.
- › Built VBScript integrations to trigger .NET DLLs, improving automation workflows.
- › Investigated and resolved a QA-blocking bug that couldn't be reproduced by others by setting up a full end-to-end environment locally—demonstrating initiative and deep system understanding.
- › Took ownership of documenting the system setup and functionality for onboarding and training new joiners, leveraging strong analytical and communication skills.
- › Assigned to investigate recurring manual workarounds and identify root causes. Successfully resolved 60% of issues internally and reported the remaining 40%—linked to a third-party tool—for vendor resolution, reducing long-term manual effort.
- › Collaborated with Azure specialists to optimize deployment and system reliability.

### Senior Software Engineer

📅 February 2015 – December 2021

SLK Software for Fifth Third Bank, USA

- › Developed a critical banking application for calculating customer exposure, utilizing VB.Net and .NET Framework 4.5 within an MVC architecture. The UI was built with HTML, CSS, Bootstrap, JavaScript, and jQuery.
- › Led the development of a Small Business Loans application, creating multiple Web APIs in C# to support a React.js frontend. Deployed and configured the application on Microsoft Azure for scalability and reliability.
- › Developed a .NET Core API to configure the application, which was successfully deployed on IIS, ensuring smooth integration with existing infrastructure and providing a flexible configuration management system.
- › Created reusable NuGet packages to enhance development efficiency across multiple applications, ensuring consistency and reducing development time.
- › Developed ASP.NET Web API using object-oriented programming methodologies, implementing token-based authentication and utilizing NHibernate for data access and log4net for error logging.
- › Played a key role in the migration of data during a bank merger, developing and executing batch jobs to transfer data between servers with minimal downtime.
- › Worked extensively with DevOps tools like GitHub, jFrog, and Jenkins to automate deployment processes, ensuring seamless integration and continuous delivery of updates.
- › Followed Test Driven Development (TDD) practices, achieving maximum code coverage and high-quality deliverables.

## CERTIFICATIONS

- › Microsoft Certified: Azure Fundamentals (AZ-900) — Issued: March 2025

## EDUCATION

### Post Graduate Certificate - Web Development

Humber College - Toronto, ON

- January 2022 – Dec 2022

### Bachelor's in information science & engineering

V.T.U - IN

- July 2010 – Aug 2014

## SKILLS

C# | VB.Net | ASP.Net MVC | .Net Core | Azure | IIS | AJAX | MVC | SQL Web API | Kafka | Microservices | NHibernate | React JS | Unit Testing HTML | jQuery | JavaScript | MySQL IBM DB2 | CSS | PowerShell | GitHub Scrum | Kanban

## PROJECTS

### Cash Management System

Application used to read check information and generate X9 files for bank deposits.

**Tech:** .net, C#, Entity Framework

### Commercial Credit Authorization System

Tool used by relationship managers at the bank to manage customer and calculate exposures.

**Tech:** .net, SQL, MVC, C#, VB

### Loan Application

Web app used to create loans for small businesses. Designed to use existing application through API and React.js as front end.

**Tech:** .net, API, React, C#, SQL

### CI/CD Pipeline

Automate deployment of code on git hub when a pull request is approved.

**Tech:** Jenkins, Groovy, PowerShell

### Data Migration

Batch Job to migrate data from one server to another during bank merger.

**Tech:** C#, console app, nhibernate Authentication, C#, MVC
