PROFESSIONAL SUMMARY

Self-directed and motivated full stack developer with more than 6 years of experience in development enhancement and testing of web applications. Skilled in front end technologies like HTML, CSS, JS as well as backend technologies like SQL, IBM DB2, Web API, .net framework, VB & C# along with knowledge on current technologies like react.js & .net core.

WORK EXPERIENCE

Software Engineer

SLK Software for Fifth Third Bank, USA

📅 February 2015 – December 2021

› Worked on banking application that calculates customer's exposure, developed on VB.Net, .Net Framework 4.5 following MVC architecture with User Interface using HTML, CSS, Bootstrap, Java Script & jQuery

› Collaborate with cross-functional team of business analysts & developers to determine comprehensive list of requirement specification for new applications

› Mentored teammates and organized learning sessions on new technologies

› Worked on development of application for Small Business Loans which involved creating multiple Web APIs in C# to support react.js

› Created NuGet packages to reuse functionality across multiple applications.

› Developed ASP.NET Web API using object-oriented programing methodologies with token-based authentication and nHibenrate for data access and log4net for error logging

› Served global clients and achieved 7 out of 7 client satisfaction score.

› Developed .Net core application which includes creating API and using Entity Framework core for database operations

› Worked on DevOps tools like GitHub for version control, jFrog to save artifacts and Jenkins to create CI/CD pipelines

› Followed Test Driven Development (TDD) with maximum Code Coverage

TOOLS

Visual Studio | **IIS** | **SQL Server** | **Git** | **Jenkins** | **jFrog** | **IBM Data Studio** | **Microsoft SQL Server** | **Photoshop** | **VersionOne** | **VSCode**

EDUCATION

Post Graduate Certificate - Web Development

Humber College - Toronto, ON

📅 January 2022 – Dec 2022 (expected completion)

Bachelor of Engineering - Information Science & Engineering

Visvesvaraya Technological University - IN

📅 July 2010 – Aug 2014

SKILLS

C# | **VB.Net** | **ASP.Net** | **.Net Core** **AJAX** | **MVC** | **SQL** | **Web API** **NHibernate** | **React JS** | **Unit Testing** **HTML** | **jQuery** | **JavaScript** | **MySQL** **IBM DB2** | **CSS** | **Node** | **PHP Groovy** **Mongo** | **Express** | **PowerShell** **GitHub** | **Scrum** | **Kanban**

HONORS & AWARDS

Innovation Award (2019) – SLK Software Pvt. Ltd.

PROJECTS

nCino

nCino is a Salesforce based application used to create loans. Supported by API & Kafka tool for data transfer.

Tech: .net core, Kafka, API, C#, Entity Framework

Commercial Credit Authorization System

Tool used by relationship managers at the bank to manage customer and calculate exposures.

Tech: .net, SQL, MVC, C#, VB

Loan Application

Web app used to create loans for small businesses. Designed to use existing application through API and React.js as front end.

Tech: .net, API, React, C#, SQL

CI/CD Pipeline

Automate deployment of code on git hub when a pull request is approved.

Tech: Jenkins, Groovy, PowerShell

Data Migration

Batch Job to migrate data from one server to another during bank merger.

Tech: C#, console app, nhibernate Authentication, C#, MVC
